THE MAGNETIC
MIND INSTITUTE

The Magnetic Mind

Digital Planner Users Manual (Version 6)

Welcome to the Beta Test

Thank you for stepping up to test the Magnetic Mind Digital Planner. This application is not just a habit tracker; it is a meticulously engineered environment designed to help you organize your subconscious mind and execute on your highest potential.

The Architecture of Transmutation:

- **Clarity:** We first define what you want down to the absolute specific detail.
- **Immersion:** We surround your senses with that goal utilizing offline libraries, custom scripts, personalized audio loops, and a built-in 432hz tone that induces deep relaxation, improves sleep, and guides your goals directly to the subconscious.
- **Action:** We bridge the gap between imagination and physical reality through highly structured daily requirements.

Over the following pages, you will learn how each module of the application is designed to reprogram your paradigm.

Daily Tab

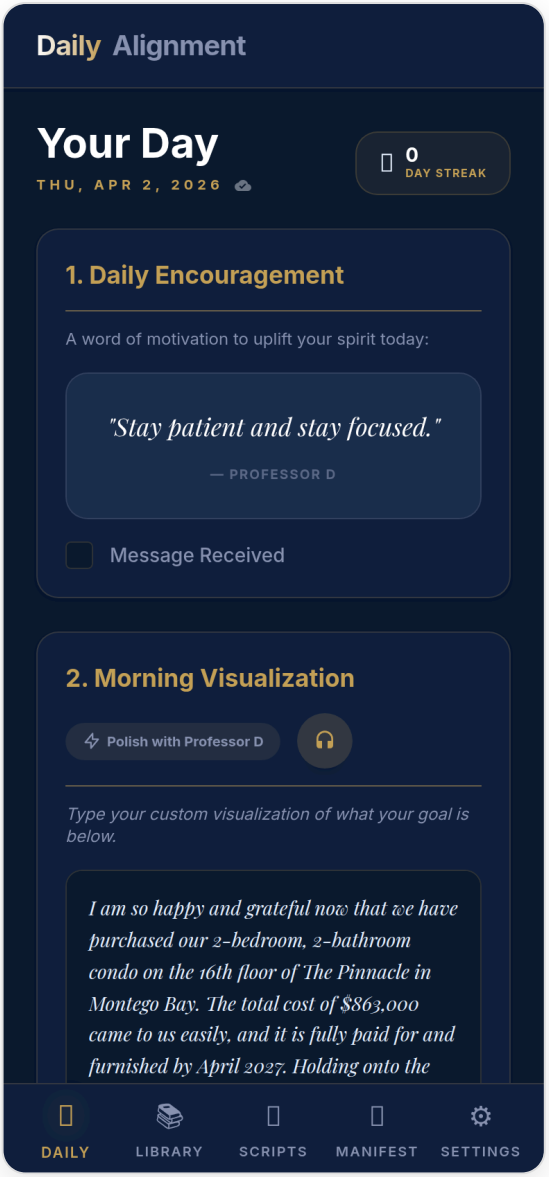
The Daily Tab is your central command center for cultivating consistent, powerful habits and expanding your energetic field. **All your entries are securely synced and backed up to the cloud!** If you ever drop, break, or replace your phone, your sacred data is never lost. The Daily Tab tracks your consistency through a Daily Completion Streak.

To successfully complete a day and turn the daily progress GREEN, you must check off these 6 absolute core tasks:

- **1. Morning Visualization:** Listen to or visualize your goal when you wake up.
- **2. Daily Gratitude:** Write down 3 present-tense gratitudes.
- **3. Inspired Action:** Commit to and complete one tangible action toward your dream.
- **4. Evening Release:** Visualize letting go of resistance before bed.
- **5. Daily Encouragement:** Read the daily passage of wisdom.
- **6. Daily Study:** Select and complete your daily dedicated study material.

In addition to your 6 mandatory tasks, the Daily Tab provides highly effective bonus tools that DO NOT affect your daily completion streak, but massively compound your results:

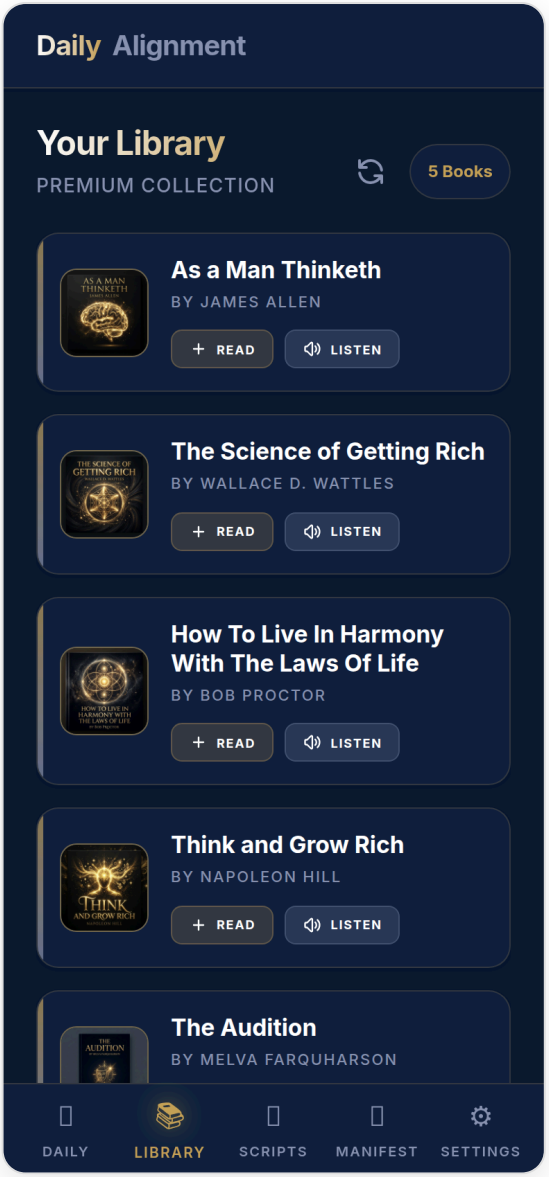
- **432hz Tone (Headphone Icon):** Tap the headphone icon to activate a continuous 432hz frequency. This tone induces deep relaxation, helps you sleep, and primes your subconscious mind to receive your goals.
- **Send Love:** Send out 3 waves of unconditional love to distinct individuals every day to harmonize your manifestation.
- **6 Most Important Things:** Prepare for tomorrow using the $25,000 Ivy Lee method. Write down the 6 most pressing priorities.
- **Today's Wins:** Keep a running journal of your biggest wins, synchronicities, and breakthroughs.



Library Tab

The Library Tab serves as your personal offline repository for high-frequency texts and paradigm-shifting books. **This entire section is meticulously engineered to function powerfully even completely OFFLINE.** Whether you are on an airplane or disconnected from cellular service, you always have access to your most fundamental material.

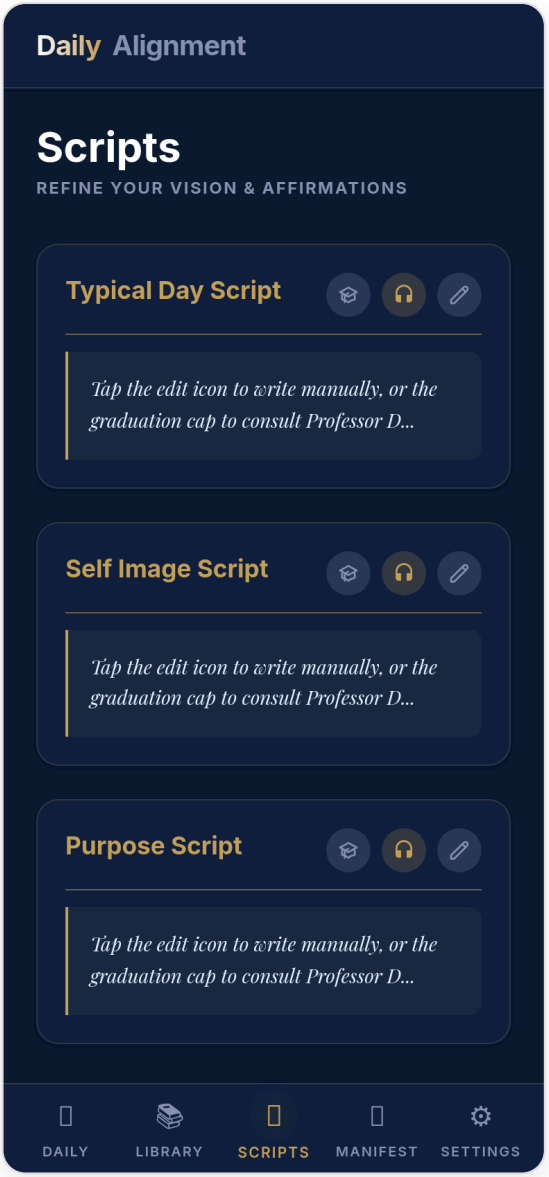
- **Distraction-Free Reading:** Immerse yourself in the knowledge with an uninterrupted, full-screen offline reader.
- **Advanced Audio Playback:** Not in a place to read? Utilize the native, offline Text-to-Speech function to have your device read entire chapters out loud to you while you drive or walk.



Scripts Tab

The Scripts Tab is your subconscious rewiring chamber. Here you organize the precise language and imagery necessary to alter your current paradigm.

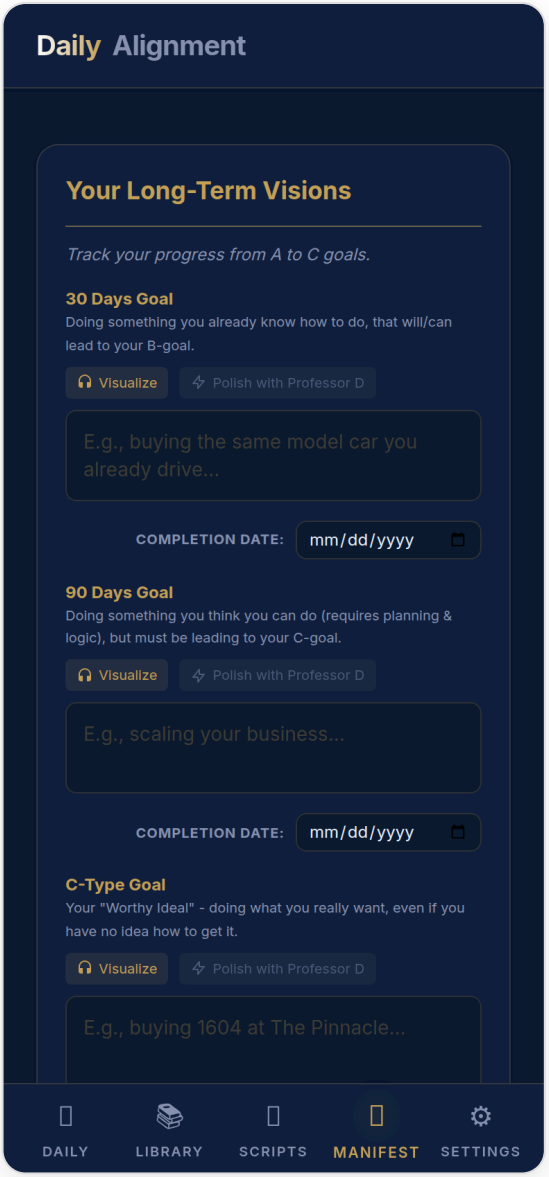
- **Foundational Scripts:** Create, store, and refine your core C-Goal Script, Self Image Script, and Purpose Script using AI consultation directly from Professor D.
- **Graduation Cap Icon:** Tap this to have Professor D ask you 3 questions. Your answers are then used to instantly write a powerful, polished script for you if you need help getting started!
- **Pen Icon (Edit):** Easily edit, refine, or update any of your scripts by tapping the pen icon.
- **Headphone Icon (432hz Tone):** Tap the headphone icon to immerse yourself in the 432hz frequency while you read or write and help get your goals safely to your subconscious.
- **Affirmation Architect:** Command the universe by generating bespoke affirmations regarding your specific Goal, Financial Wealth, Health and Vitality, or Career momentum.
- **Expansion Vision Board:** A gorgeous, full-screen interactive grid where you can upload, expand, and visually immerse yourself in images that represent your ultimate destination and keep them permanently top of mind.



Manifest Tab

The Manifest Tab is where you refine and program your major life goals into reality. All text here is heavily encrypted and safeguarded.

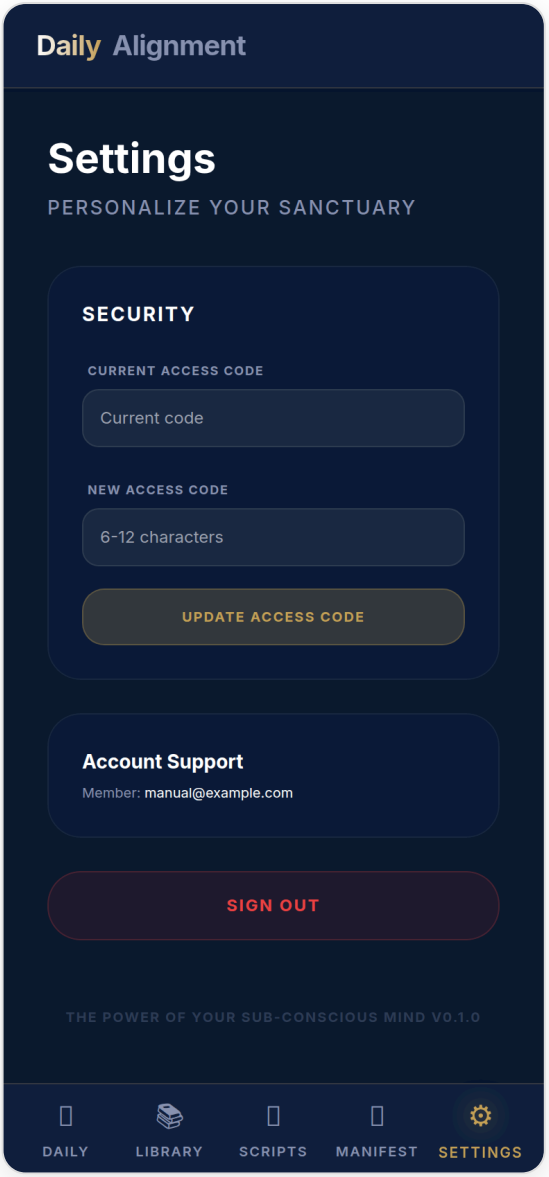
- **Long-Term Visions (A, B & C Goals):** Define your foundational targets with completion dates and detailed visualizations so you always know exactly what you are aiming for. *(Note: 3 days before the completion date of your goal, the green text turns orange, and on the exact day it turns red!)*
- **Professor D's Polish Feature:** Hit the "Polish AI" button to automatically have Professor D rewrite your goal into powerful, present tense verbiage using commanding conviction.
- **Deep Subconscious Rewiring (Audio Looper):** Use the native microphone to record your own voice declaring your C-Goal. Play it back automatically looped as you drift off to sleep, overlayed onto perfectly tuned Theta brainwave frequencies.
- **Daily Wisdom:** Receive dynamic, daily quotes related strictly to the subject of manifesting your desires into reality.



Settings Tab

The Settings Tab handles platform synchronization, personalized profile management, and system security.

- **Cloud Backup Assurance:** The platform syncs seamlessly in real-time with our encrypted servers. Rest comfortably knowing if you install the app on a new device, your historical manifestations, scripts, and timelines instantly and securely download.
- **Typical Day Automation:** Access Professor D to automatically generate and save your perfect "Typical Day" visualization into your master vault.
- **App Access Code:** Lock the application securely behind a personalized 6-12 character passcode to ensure complete privacy of your deepest goals.



Tester Call to Action

As a beta tester, your feedback is the most valuable asset we have in refining this technology before public launch. Here is exactly what we need from you:

- **1. Absolute Consistency:** Use the app daily. Your mission is to hit a 7-day green streak on the Daily Tab. If the app fails to record your streak or loses it, we need to know.
- **2. Break The System:** Try to use features while completely disconnected from the internet. The Library and Audio Looper should perform flawlessly offline.
- **3. Record Friction Points:** Whenever you feel confused by the interface or if a button doesn't do what you intuitively expect it to do, write it down immediately.
- **4. Security Verification:** Test the passcode functionality. Ensure your private scripts remain locked and secured.

See you inside the application.
